EDUCATION

D.Y. Patil College of Engineering Akurdi

BE - Artificial Intelligence and Data Science - CGPA - 8.43

2022 – Present

Pune, Maharashtra

Jawahar Navodaya Vidyalaya Wardha

SSC- 93 Percentage

Wardha, Maharashtra

SKILLS

Programming Language: C++,Python,SQL

CS Fundamentals :Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming

Python Libraries :Pandas,Numpy,Matplotlib,Seaborn

Web Development :HTML,CSS,Bootstrap ,React.JS,Flask

Tools :Power BI

Databases :MySQL

Version Control :Github

Development Tools :VS code,Jupyter Notebook

PROJECTS

MoneyMate – Personal Finance Manager [↗](#) | React.js,Next.js,Gemini AI

- Developed a robust financial management system with features for tracking income, expenses, and recurring transactions across multiple user accounts.
- Implemented data visualization tools with interactive charts to provide users with actionable insights into their financial health.
- Integrated Gemini AI to enable intelligent features, including automated transaction categorization and receipt scanning.
- Engineered an alert system that notifies users via email when their spending approaches budget limits, enhancing financial control

E-Card-Generator [↗](#) | Flask,SQLAlchemy

- Designed a full-stack E-Card-Generator application to streamline requests for Aadhaar, PAN, Driving License, and Voter ID cards.
- Implemented secure authentication, request lifecycle tracking, and generating unique identification number.
- Built an admin dashboard for request verification, approval, and user management using Flask and SQLite.

Feedback Management System [↗](#) | C++,OOPs

- Programmed a console-based C++ application leveraging Object-Oriented Programming (OOP) principles
- Applied advanced OOP principles, including classes, inheritance, encapsulation, polymorphism, to manage user-specific functionalities.
- Enabled students to submit and view feedback, while admins could analyze and manage submissions.

CERTIFICATIONS

- Web Development
- Tata Group's Data Visualization: Empowering Business with Effective Insights
- Python libraries for data analysis

LINKS

- LeetCode (Demonstrated expertise in Data Structures and Algorithms by actively solving problems on LeetCode.)
